

All About Arboriculture

Commercial Project Guide

Specialists in Arboriculture &
Vegetation Management.

We're literally **All About Arboriculture.**

From vegetation management, to tree surgery and everything in between, we're serious about delivering safe projects, efficiently to our valued clients.

Introduction

All About Arb specialises in comprehensive arboricultural services designed to meet the demanding requirements of commercial and industrial projects. Founded and led by Nic, a certified arborist with extensive industry expertise, our team is equipped to handle large-scale projects, ensuring each job is completed safely, efficiently, and with minimal disruption.

Our clients span sectors such as construction, infrastructure, and land management, where we consistently deliver tailored tree care and site clearance solutions. As a fully insured and compliant contractor, we're proud to uphold rigorous industry standards, prioritising safety, environmental stewardship, and precision on every project.

Our Vision

To be the leading provider of sustainable, high-quality arboricultural services in the commercial sector, setting the standard for safety, environmental stewardship, and professionalism across the industry.

Introduction

About our company

**A Reliable,
Safe and
Professional
Arboriculture
Partner.**

At All About Arb, we're dedicated to delivering high-quality arboricultural services that support the success of large-scale commercial and industrial projects. Our mission is to blend our passion for tree care with a commitment to safety, environmental responsibility, and client-centred service. We bring these beliefs to life on every site, whether conducting comprehensive site clearances, managing invasive species, or providing detailed tree surveys.

We believe in delivering the highest quality of workmanship, ensuring that every task we undertake is completed with precision and care to support our clients' long-term goals. Sustainability is at the core of our operations; we prioritise environmentally responsible practices that protect and enhance natural landscapes, creating a positive impact on every site we manage. Safety is non-negotiable, and we maintain strict safety protocols to protect all stakeholders while ensuring compliance with industry regulations. Finally, our clients are at the heart of everything we do—we build strong partnerships by taking the time to understand unique project requirements, timelines, and challenges, enabling us to deliver solutions that truly align with each client's vision.

Our fundamental beliefs & values help us in the decision making processes.

Teamwork & Collaboration

We value a collaborative approach that combines our team's skills with client insights to deliver tailored, effective solutions that enhance each project's success.

Reliability & Responsiveness

We value being a dependable partner. Our team is responsive to our clients' needs, ready to adapt, and available to support projects with expert guidance and timely solutions.

Commitment to Quality

We value continuous improvement, using advanced techniques and high-quality equipment to achieve exceptional results in every aspect of arboriculture.

What we offer

Services

We offer an extensive suite of **arboricultural & vegetation management services** to meet your requirements.

Tree Management

Expert tree care, pruning, and maintenance to ensure safety and health.
Hazard assessment and risk management for trees in public and private spaces.

Invasive Species Management

Identification and removal of invasive plant species to protect native flora.
Environmentally responsible control methods to minimise impact.

Grounds Care

Comprehensive grounds maintenance, including grass cutting and shrub care.
Seasonal planting and flower bed management to enhance your landscape.

Site Clearance

Safe and efficient site clearance for construction, redevelopment, or land restoration.
Tree and vegetation removal, including debris management.

Tree Surveys & Documentation

Detailed tree surveys to assess tree health, risk, and preservation.
Comprehensive reports with recommendations for management and compliance.

Stump Removals

Professional stump grinding and removal to clear space for landscaping or construction.
Safe and efficient stump removal with minimal disruption.

Work Processes

How we work

We work with clients to develop the right strategy from the very first stage to last stage.

Site Assessment

Next, we conduct an on-site assessment to evaluate tree health, vegetation, and environmental factors, allowing us to develop a customised plan. Our team assesses any risks and identifies the best approach to complete the project safely.

Execution

Our experienced arborists bring the plan to life, using industry-leading equipment and techniques to execute each phase of the project with precision. Whether it's site clearance, tree surgery, or de-vegetation, we follow strict safety protocols.

Ongoing Support

For clients with ongoing needs, we provide continued support to maintain and monitor the health of the site's vegetation. We're here to help with future projects, providing reliable, professional solutions whenever you need us.

01

Consultation

Every project begins with a thorough consultation to understand your goals, site specifics, and any unique requirements. We take the time to discuss your objectives, timelines, and potential challenges, ensuring we're fully aligned.

02

Proposal

Based on our assessment, we prepare a detailed proposal outlining the scope of work, timelines, and costs. Our strategy prioritises safety, environmental responsibility, and minimising disruption to

03

04

Review

Upon project completion, we conduct a final review to ensure everything has been executed to the agreed specifications. We value client feedback and work collaboratively to address any additional needs, ensuring complete satisfaction with the results.

Client

Care Home

Project

Tree Removal & Grounds Clearance

Project Overview

All About Arb was contracted by a Care Home to safely remove several hazardous trees and clear overgrown vegetation encroaching on the property's communal areas. The trees posed significant risks due to age and structural instability, particularly those overhanging a nearby road. The project's aim was to enhance safety for residents, staff, and visitors by removing these dangerous trees and performing ground clearance to open up pathways and improve site accessibility.

Challenges

The project presented several unique challenges, including:

- **Proximity to Residents and Buildings:** Some of the trees were positioned near heavily used resident areas and communal spaces. This required controlled, precise removal techniques to ensure that nearby people and buildings remained safe.
- **Strict Health & Safety Standards:** Working on Care Home premises meant operating under rigorous health and safety protocols, with extra care to minimise noise and disturbance to ensure residents' comfort and well-being.
- **Overhanging Trees and Roadside Safety:** A portion of the trees extended over a busy adjacent road, creating the need for traffic management. We needed to co-ordinate road access with local authorities, temporarily divert traffic, and safely control the work zone to protect both road users and our team during removal operations.
- **Time Constraints and Scheduling:** The project had to be completed within a limited timeframe to reduce disruption to the Care Home. This required meticulous planning and co-ordination with the Care Home's management to optimise timing and avoid impacting daily activities.
- **Environmental Sensitivity:** In alignment with the Care Home's sustainability goals, the project aimed to recycle as much green waste as possible, requiring an environmentally conscious approach to our waste management.

Actions

Our team implemented a structured approach to manage these challenges, which included the following actions:

- **Comprehensive Site Assessment and Risk Evaluation:** We began by conducting an extensive site survey to assess each tree's condition and its proximity to the Care Home buildings and road. This allowed us to devise the safest and most efficient removal strategy for each tree, accounting for both on-site and roadside risks.
- **Traffic Management Plan and Road Safety Coordination:** For trees overhanging the road, we developed a traffic management plan in collaboration with local authorities. This plan included temporary lane closures, clearly marked detours, and roadside barriers to direct traffic away from the work area, ensuring a safe operating environment for both our team and road users.
- **Skilled Arborist Deployment and Specialised Equipment:** Certified arborists were assigned to handle tree removal near buildings and along the roadside. This ensured that branches and tree sections could be lowered safely and controlled precisely, especially in high-risk areas close to footpaths, buildings, and the road.

Care Home Tree Removals & Ground Clearance

Operational Plan

Operational Plan

Our operational plan was essential to completing the project smoothly and safely, considering both on-site and roadside risks:

- **Work Zone Establishment and Traffic Safety Measures:** We set up restricted access zones with safety barriers and clear signage, ensuring safe navigation for residents and Care Home staff around the work area. Along the roadside, we coordinated with local traffic management teams to install temporary lane closures and safety markers, maintaining traffic flow while keeping road users safe.
- **Sequential Tree Removal, Starting with Roadside Trees:** We prioritized the removal of roadside trees first to complete the most logistically complex work early in the project. Utilizing crane-assisted techniques and rigging, our team carefully dismantled these overhanging trees section by section, preventing debris from impacting the road or nearby structures.
- **Controlled Ground Clearance:** After tree removal, we systematically cleared overgrown vegetation, carefully managing debris and bagging all waste immediately to prevent obstruction. This opened up previously overgrown pathways and improved accessibility for the Care Home's residents and staff.
- **End-of-Day Clean-Up:** At the close of each workday, our team performed a thorough clean-up, removing barriers, equipment, and any residual waste to ensure safe, accessible grounds for residents and staff.

Results

The project was completed successfully, delivering the following outcomes:

- Enhanced Safety for Residents and Road Users:** By removing the hazardous trees and clearing overgrown vegetation, we significantly reduced the risk of falling branches and enhanced safety for both Care Home residents and road users. The Care Home management appreciated the reduction in liability and improved peace of mind for residents, families, and visitors.
- Aesthetic and Functional Improvements:** With overgrown areas cleared and dangerous trees removed, the Care Home grounds now offer more open, inviting spaces for residents. Walkways are more accessible and safer for residents, especially those with mobility concerns, enhancing overall site functionality.
- Minimal Disruption and Positive Feedback:** Through careful scheduling and clear communication with the Care Home, our team was able to complete the project with minimal impact on daily routines. Residents, staff, and management all expressed appreciation for the smooth execution, professionalism, and respect shown to the Care Home community.
- Sustainable Waste Disposal:** All green waste was processed in alignment with the Care Home's sustainability goals, with wood chippings repurposed as mulch and larger branches sent to local recycling centers. This commitment to environmentally responsible practices was well-received by the Care Home and contributed positively to their sustainability objectives.

Regular Tree Maintenance Case Study

Client

Martin & Co.

Project

Tree Maintenance for rental properties

Project Overview

Martin & Co, a property management company, sought All About Arb's expertise to carry out hedge and tree maintenance across several rental properties in their portfolio. The goal was to enhance the properties' curb appeal, maintain a safe and tidy environment for tenants, and ensure that the trees and hedges did not pose any risks to the properties or the surrounding public areas. The work was scheduled to take place in several stages across different locations.

Challenges

- **Diverse Property Locations:** The rental properties were located in various residential areas, requiring efficient scheduling and logistics to manage the work across multiple sites.
- **Overgrown Trees and Hedges:** Some of the trees and hedges had become overgrown, leading to access issues for tenants, obstructing pathways, and in some cases, blocking light from windows.
- **Tenant Disruption:** The work had to be conducted with minimal disruption to tenants, some of whom lived in close proximity to the trees and hedges. Any noise or disruption needed to be kept to a minimum, and communication with tenants had to be clear and timely.
- **Safety Concerns:** Overgrown branches posed a risk to the property, tenants, and surrounding areas. Trees near walkways and fences needed to be pruned or removed to avoid damage or potential injury.

Regular Tree Maintenance Operational Plan

Operation Plan

- **Inspection and Assessment:** A full survey of the trees and hedges across all properties was conducted to assess their condition and identify any immediate risks. This included evaluating the structural integrity of the trees and checking for any disease or pest infestations.
- **Tailored Maintenance Plans:** Based on the survey results, a tailored maintenance plan was created for each property, detailing the necessary pruning, thinning, and removal of problematic trees or hedges.
- **Pruning and Shaping:** Overgrown hedges were trimmed back to improve the appearance of the properties and enhance access for tenants. Trees were pruned to remove deadwood, reduce risk, and improve the overall health of the trees. This also included lifting canopies to ensure clear pathways and prevent obstruction of light.
- **Coordinating with Tenants:** We worked closely with Martin & Co to ensure that tenants were informed about the upcoming works, with clear communication about the schedule and any potential disruptions. Works were scheduled during times that would cause minimal disturbance, particularly in high-traffic areas.
- **Waste Removal and Clean-Up:** After the work was completed, all debris, branches, and waste were removed from the site, leaving the properties tidy and free of any hazardous material.

Results

- **Enhanced Curb Appeal:** The rental properties benefited from a significant improvement in their appearance, with well-maintained hedges and healthy trees enhancing the overall curb appeal.
- **Increased Marketability:** With the improved landscaping, Martin & Co's properties stood out in the competitive rental market, attracting prospective tenants and helping to maintain high occupancy rates.
- **Ongoing Maintenance:** Martin & Co received a detailed report outlining the work completed and recommendations for future tree and hedge care, ensuring that the properties continue to benefit from well-maintained outdoor spaces moving forward.
- **Safer Living Environment:** The work removed potential hazards posed by overgrown or unstable trees, improving safety for tenants and reducing the risk of damage to property and surrounding areas.
- **Improved Tenant Satisfaction:** Tenants reported a better living experience, with cleaner, safer outdoor spaces and improved access to their homes. The properties were more visually appealing, leading to positive feedback from both tenants and landlords.

We're proud arborists...

See what our customers think about working with US...

“

Nic and his team were incredibly professional and skilled from start to finish, every part of this job was organised to a high standard. They really know what they are doing, the taking down of the trees was done safely and all waste moved from the space. Nic and his team are friendly and will answer any questions you may have.

S. Mclean
Client

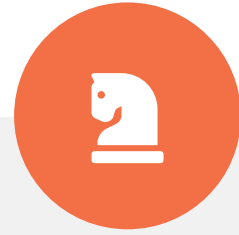

“

What an amazing job Nic and his team did. They cut back all the overgrown foliage to expose parts of the space we didn't even know were there. Removed dead trees and cut back the overgrown ones. They did an efficient, thorough job and would definitely recommend them. I can't believe they managed to get it all done in one day, especially in the heat.

D. Coall
Client

We are proud to serve our clients with excellence.

Reasons

To work with us!

Unmatched Safety and Compliance Standards

All About Arb understands the complexities of working in commercial settings, particularly those requiring high safety standards like care homes, schools, and public spaces. Our team is fully trained in risk management and adheres to rigorous health and safety protocols, ensuring that every job site is secure and compliant with industry regulations. With experience in managing traffic safety and restricted zones, we make safety our top priority for clients and the public.

Efficient and Minimal Disruption

We recognise that commercial environments need to remain operational and accessible. Our team works flexibly, scheduling tasks to minimise disruption to daily business activities. With skilled arborists, precise equipment, and careful planning, we complete each job quickly and efficiently, providing quality results without compromising your time or customer experience.

Tailored Solutions and Transparent Communication

Every site has unique requirements, and we collaborate closely with clients to understand specific needs and constraints. From initial consultation to project completion, we provide clear, ongoing updates to keep you informed. We tailor our services—from tree removal to ground clearance and waste disposal—to align with your operational priorities, timelines, and sustainability goals.

Environmentally Responsible Practices

Sustainability is at the core of our approach. All About Arb is committed to reducing our environmental impact through responsible green waste disposal and recycling. We work to repurpose wood, create mulch, and minimise waste sent to landfills, helping you achieve your organisation's environmental objectives while improving the aesthetics and safety of your grounds.

**Safe,
Reliable,
Efficient,
Professional,
Arborist Services.**

Final Words.

A letter from Nic, our founder.

By now, you'll have seen the scope of services we provide and the commitment we bring to each project. At All About Arb, we pride ourselves on delivering tailored solutions that prioritise safety, efficiency, and environmental care qualities that are essential in any commercial setting.

From careful planning and clear communication to sustainable practices and minimal disruption, our aim is to enhance your grounds while respecting the daily operations of your organisation. Whether it's removing high-risk trees, clearing overgrown spaces, or conducting routine site maintenance, our team of skilled arborists is here to ensure your property is in safe, professional hands.

If you're looking for a partner who values quality, responsibility, and a client-focused approach, we'd be delighted to discuss how All About Arb can support your needs. Please don't hesitate to get in touch at nic@allaboutarb.co.uk or visit our website for further details.

Thank you for considering All About Arb - we look forward to the opportunity to work with you.
